Expense Assignment System (EAS) IV

What It Is...

EAS IV is a web-based tool essential to the Department of Defense because it assists the Military Health System (MHS) in identifying the total cost of providing healthcare to its beneficiaries.

Key Features and Benefits

- Provides complete, timely and accurate cost information to the MHS
- Supports management of health care resources
- Delivers critical business care analysis and decision support capabilities
- Provides data for corporate cost reporting
- Supplies cost-per-unit of service produced
- Combines clinical workload, labor hours and expenses

Highlight

April 2012: EAS IV upgrade includes a new business objects (BOXI) web-based option. This upgrade gives users access to all EAS IV standard reports, as well as the ability to create ad hoc reports using BOXI software on a centralized server. It also provides new features to the user-base as the cost allocation tool product evolves.

What Users Are Saying...

“It works great!”

“The EAS system's response time is usually very quick.”

“This system is user-friendly.”
